FY 2011 Planning-revised 6-Sep-10

For FY 2010, the newly combined Group 3/8, executed on it's 2010 plans with great success. The standing monthly schedule / rotation allowed our members to plan for the training and activities they wished to participate in very effectively. The standardized schedule also minimized scheduling conflicts and allowed members to enjoy balanced participation in all aspects of the CAP program.

Our opportunity areas for 2011 include: improved communications training and exercises, SLS / CLC / UCC courses, F5/91 clinics and Aerospace education. The submission for 2011 builds upon the successes of 2010 and cares for the opportunities. The below budgetary request / training calendar as outlined below is accordingly submitted for approval and funding.

2011 Florida Wing Precepts in action

PLANNING WITH PEOPLE:

The overarching guidance in our annual planning is our people. This is what drives our scheduling. ES and Cadet activities are rotated monthly around the group to ensure that all members have at least 1 ES and 1 Cadet OFlight per year at their "home" airport, while also providing them the opportunity to work with the peers in Group 3 by attending events at all other locations throughout the year.

TRAIN WITH PURPOSE:

Our staff works to maximize the benefit of all events. The rotational schedule not only facilitates our members ability to train, but it also gives our ES teams the opportunity to exercise our ability to execute our missions from any location across the group. All ES training dates are backed by simulated mission scenarios to provide a realistic experience to our members during their evaluations. During Cadet O'Flights, we work closely with our TLC to ensure that learning opportunities are provided throughout the day for cadets on the ground

EXECUTE WITH EXCELLENCE:

Group 3 has a proven track record of being there to answer the call, and we will continue to build upon this operational excellence in 2011 by improving our communications abilities and Professional development programs.

MAKING THE FUTURE HAPPEN:

By meeting our goals set forth in our 2011 plan, the future will be secure for Group 3. We will have a model program that drives participation by all members, in all of the programs of CAP. We will continue to grow our membership as well as their satisfaction in the overall program.

2011 planning event descriptions

ES Evaluations (Air/Ground/Base):

All ES eval days are run in a simulated mission environment. This provides our members opportunity for renewal of ratings as well as new qual sign-offs. In addition, this allows us to evaluate members at all levels of mission ratings.

COMDEX

These are intended to be group wide communications exercises to test the ability to pass traffic during an emergency situation using only simplex and HF radios. Funding is request to provide the ability to exercise the airborne repeater as well.

This plan represents the major/funded plans for Group 3 for FY2011. It does not include squadron sponsored activities. Group 3 will allow for additional inputs to the schedule throughout the year to address any future unmet needs that may be identified, this includes A/B cut classes and more.
